

Kathie Murphy

Kathie Murphy works principally in polyester resin, a substance that allows her to make her own material with which to explore the effects of light and colour through shape and form.

Resin is a plastic that starts as a liquid. At the early stage it can be coloured using special pigments, which Murphy does in a painterly way, making the work particularly individual. As well as being colourful, resin is warm, tactile and very wearable.

Education

Post Graduate Diploma, Glasgow School of Art, 1991
BA (Hons) Jewellery, Middlesex Polytechnic, 1986

Exhibitions

Dazzle @ Oxo Tower, London
Made showcase, Yorkshire Sculpture Park, Wakefield, 2015
